

PM-420 ACTIBON SHOCK

ALGAECIDE

PM-420 ACTIBON SHOCK is a product with algaecide properties which accelerates and facilitates action by oxidants such as chlorine, bromine and oxygen. It avoids the growth of green algae and pink bacteria (*Methylobacterium* spp). It is not compatible with biguanides treatment.

APPLICATIONS:

- Recuperation of green waters.
- Elimination of pink bacteria
- Chlorine activation in waters with high concentrations of isocyanuric acid.

METHOD OF USE AND DOSAGE:

- Keep the pH of water between 7.2 – 7.6.
- Initial: Add 0.5 L/100 m³ of water.
- **Maintenance:** Add 0.2 L/100 m³ of water once a week.
- **Shock treatment:** Add 0.5 L/100 m³ of water if water is green due to a storm or a lack of disinfectant.
- If pink stains appear on the pool walls and/or accessories due to the presence of pink bacteria, add 0.5 L/100 m³
- PM-420 ACTIBON SHOCK can be spread directly throughout the whole pool with filtration running. Bath can take place immediately.

PHYSICAL PROPERTIES:

- Appearance: colourless liquid
- Odour: odourless
- Density: 1.330 – 1.360 g/cm³
- pH: 6.1 – 8.3
- Solubility in water: Miscible in water in all proportions

HAZARDS AND PRECAUTIONARY STATEMENTS:

- Suspected of damaging fertility or the unborn child.
- May cause drowsiness or dizziness.
- May cause damage to organs through prolonged or repeated exposure
- Very toxic to aquatic life with long lasting effects. Avoid release to the environment.
- Keep out of reach of children.
- Wear protective gloves and eye/face protection. In case of accident or if you feel unwell, seek medical advice immediately (show the label where possible).
- Dispose of contents/container in accordance with applicable regulations.

PACKAGING:

Bottles of 0.5 and 1 L
